

ASep Single Use Tourniquets

The Gold Standard for Single-Use & Single Patient Use Tourniquets

ASep Healthcare's award-winning, innovative single-use disposable tourniquet provides usability, patient comfort and affordability.

Designed by clinicians for ease of use and a better experience for patients, it allows effortless conversion from reusable devices to single-use, avoiding a potential transfer vehicle for the spread of nosocomial infections, including MRSA.

Tournistretch[®] is the only single-use tourniquet that can be adjusted with one hand while holding a needle or cannula. Tournistrip[®] is the only single-use tourniquet, which has been clinically proven. Both been evaluated by ANTT[®] as a product that helps promote safe aseptic technique and effectively reduces the risk of cross infection.
